

# Uruguay

(1856- )

A republic in South America, on the Atlantic coast between Brazil and Argentina.. In 1811 it revolted against Spain and Uruguay became an independent republic in 1828. Uruguay's history during the 19th century was one of anarchy and civil war. After 1900, a stable government enabled the country to make considerable economic and social progress. A military coup in 1973 brought into power a brutal military dictatorship. Civilian rule was reestablished in 1985.
